

# On the frontier: Protect, repair and restore

## **Webcast: Protecting, repairing and restoring function in the central nervous system**

by **Andrew Conner**

The National MS Society's Dec. 5 webcast, **Protecting, Repairing and Restoring Function in the Central Nervous System**, features a team of top MS researchers.

Barancik Prize recipient Jonah Chan, PhD, of the University of California, San Francisco; Dr. Ben Barres of Stanford University; Dr. Rhonda Voskuhl of UCLA; and the Society's Chief Research Officer Timothy Coetzee, PhD, discuss the latest findings in this promising area of MS research and what they might mean for people living with the disease.
